

Your event is important to you. And hosting a virtual event can be risky. This is why Kate and her team have invested in a virtual studio setup that is designed to make sure your event is a hit. Whether it is getting the right background setting or ensuring high quality technology, we've got you covered. Kate is also an eSpeaker's Virtual Certified Presenter.

## Studio Customization Options

Looking for the perfect vibe to integrate with your event? Kate can customize her virtual studio so that it is the right fit for your needs.

---

<b>Standard Background</b>	Kate with her books in the background. Bookshelf can also display client-specific props if desired
<b>Greenscreen Option</b>	A large 6 x 9-foot chroma key professional-grade greenscreen that allows you to use your own background
<b>Camera Angle Options</b>	Three-camera-view capability. Main camera is an adjustable wallmount camera for standing or sitting, which is perfect for a more relaxed fireside chat feel.

## Behind-the-Scenes Technology

Kate's studio is equipped with everything needed to host a smooth virtual event.

---

<b>HD 4K Camera</b>	The studio uses three high-quality 4K Marshall CV605-U3 PTZ HDMI Cameras that can be used for recording or connecting to any virtual
<b>Microphone</b>	Your event will have great audio thanks to a Rode 5V wireless lavalier mic with long lasting 6-hour battery capacity.
<b>High Speed Internet</b>	Take no risks of Kate cutting out or being dropped from her keynote with a Comcast hard-wired Gig Speed Internet.
<b>Studio Lighting</b>	Two professional-grade GTX Studio GS - LEDFP100 bi-color flat panel LED lights with variable color temperature control
<b>Countdown Clock</b>	Rest assured Kate will start and end her session on time with an extra-large countdown clock.
<b>Livestreaming Production Capabilities</b>	High-quality livestreaming is no problem with an ATEM Mini Pro and Elgato XL Streamdeck integrated into OBS (Open Broadcasting Software)
